The application has been amended as follows:

In the specification, amend paragraph [0042] as follows:

[0042] In other embodiments, other apparatuses for holding vessels such as vessel 112 within the locking arm 106 include by way of example only and not by way of limitation clamps, threads, clips, pins, and the like. It is sufficient that the vessels be held in the locking arm 112 106 so that if inverted, the vessels will not fall out of the locking arm 106.

### ***Drawings***

2. The drawings were received on September 28, 2004. These drawings are acceptable.

### ***Allowable Subject Matter***

3. Claims 3-14, 16, and 18 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach nor fairly suggest a device wherein the locking arm further comprises a plurality of vessel openings and a matching plurality of locking ports, each of the vessel openings sized to accommodate a vessel, and each of the locking ports capable of retaining the vessel in the locking arm.
